There are three proposed rule changes. Limiting the number of updates on a ticket, excavators using white lining and mandatory positive response.

Ticket updates – this will allow the ticket to have the most up-to-date information.

White lining – has been the biggest concern and discussion point. Minnesota just passed a law allowing black paint during winter conditions. Virtual white lining would help eliminate some of the concern with white lining.

Positive Response – a communication tool between Excavators and Operators to know the status of a locate. Not to be used as a tool to excavate before the start time of a ticket.
